ISO 70 PREMIUM PLUS DOOR

FOR SECTIONAL GARAGE DOORS

With the new Premium Plus sectional garage door, your garage is protected against wind and weather. The exceptionally good insulation helps to ensure that your garage, with a living area next to it or above it, does not cool down too much even in winter. This way you avoid heat loss and actively contribute to optimising the entire building's performance balance.

This brochure tells you all about our premium door with its extra-effective EXTRA PLUS, with all the details, benefits and design possibilities. Are you looking for maximum energy efficiency and the greatest possible safety and security in addition to premium quality and the utmost ease of use? Then choose premium sectional garage doors with a total section thickness of 70 mm, made by Novoferm.

FEATURES

- ✓ Large selection of modern and top-coated surfaces and colours
- ✓ Uniform appearance of inside of door, with smooth surface and coordinating details (hinges, profiles, etc.) coloured to match the door leaf
- ✓ Maximum personal safety with anti-pinch protection inside and out
- ✓ Reliable recognition of people and obstacles with the optional "Easy" safety opto sensors
- ✓ Smooth door travel thanks to stainless steel ball-bearing tandem rollers and extremely quiet garage door operators

DISCOVER THE BENEFITS TO YOU

EXCEPTIONALLY GOOD THERMAL AND ACOUSTIC INSULATION

The patented thermally broken sections with a total thickness of 70 mm, combined with the sectional door's PUR rigid foam core, ensure exceptionally good heat and sound insulation. The additional seals between the sections and the double floor seal on the bottom of the door further increase the heat insulation and reduce heat losses.

TRIPLE-GLAZED WINDOWS

Our Premium Plus sectional garage doors are also available with triple-glazed window variants that provide not only excellent heat insulation but also outstanding light permeability.

THERMO FRAME SET

The optional sealing and insulating strip system further improves the already excellent performance of double-skinned Novoferm E® sectional garage doors. The thermal optimisation on three sides of the frame enhances insulation performance by up to 15 %* when mounted behind the opening. A plug-and-clip profile ensures quick and easy installation and can be used on all Novoferm E® sectional doors. The Thermo frame set actively supports the optimisation of building performance.

* Performance dependent on door pattern and size.

HIGH-QUALITY, UNIFORM APPEARANCE OF INSIDE OF DOOR

Compared to other doors on the market, the Premium Plus sectional garage door is also much more attractive on the inside. The inside door surface is produced in the elegantly smooth "Noblesse" finish. And the door leaf, hinges and profiles are all in Traffic white, similar to RAL 9016, for uniform colouring and a harmonious overall look. Furthermore, high-quality, ball-bearing tandem rollers in stainless steel ensure extremely smooth and even door travel.
